## Appendix A

# SYSTEM DEVELOPMENT OF AN INTEGRATED MEDICAL FACILITIES FOR OVERSEAS WORKERS AND SEAFARERS (MFOWS) SYSTEM FOR DEPARTMENT OF HEALTH – KNOWLEDGE MANAGEMENT AND INFORMATION TECHNOLOGY SERVICE (DOH-KMITS)

## GUIDELINES FOR BIDDER PRESENTATION AND SYSTEM DEMONSTRATION

### A. SYSTEM DEMONSTRATION

1. Bidders who have successfully passed the shortlisting are required to provide a live system demonstration as Proof of Concept (POC).
2. The purpose of the bidder presentation is two-fold:
  - 2.2. Check if the bidders fully understand the functional and technical requirements of the project;
  - 2.3. Illustrate the required functionalities and technical capabilities for the proposed system from the functional, technical and usability points of view through actual demonstration in two (2) use cases.
3. Schedule of the presentation and system demonstration will be on **February 19, 2019 at 9:00 AM** at the Procurement Service of the Department of the Budget and Management (PSDBM), Cristobal Street, Paco, Manila.

### B. MANDATORY REQUIREMENTS

1. Bidders are required to provide a **live system demonstration**. Bidders are required to provide their own internet connection, laptops, servers, and other accessories required to execute the said live system demonstration. The system demonstration must involve logging into the training site of the system and performing the tasks in real time. PowerPoint presentation, screenshots, and/or pre-recorded videos are not acceptable. The system application must be installed on the laptop/computer or accessed via internet.

2. The Bidder is given a total of 4 hours maximum, which included the following:
  - a. System demonstration or proof of concept involving the scripts found below;
  - b. Explanation, discussion, and presentation of their implementation plan;
  - c. Questions, answers, and clarifications on submitted documents regarding system features and capabilities.

### **C. FUNCTIONALITY AND TECHNICAL DEMONSTRATION**

The Bidder must be able to demonstrate the following minimum functionalities as required by the end-user:

1. Capability to interoperate proposed system to the test system using two (2) use cases;
2. Capability to receive feedback from the test system to the proposed system;
3. Capability to provide security measures to ensure confidentiality and privacy protection of information to and from proposed system to the test system and vice versa; and
4. Capability to generate and/or extract reports and dashboards.
