uniex D	Metro Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works				
	Volume I, Part 1 —Bidding Procedures				
1.	Section II, Page BDS·2, ITB 7.4	Replace ITB 7.4 with the following:         A site visit is planned to take place at the following date, time and place:         Date: 23 April 2020 (1 <sup>st</sup> Batch) and 24 April 2020 (2 <sup>nd</sup> Batch)         Time: 5:45 am both days         Venue: MMSP-GC Board Room, 14 <sup>th</sup> Floor, Triumph Square Building, 1618 Quezon Avenue, Quezon         City         See Site Visit Guidelines and Form-A included in Annex "C" for more details and kindly fill-up the         Form-A Confirmation Form to be submitted before Site Visit.			
0		Volume II, Part 2 —Employer's Requirements (ER) b) General Requirements (ERG)			
2.	Section 10.1 GENERAL	<ul> <li>Revise item (3) of 5<sup>th</sup> paragraph with the following:</li> <li>Inspection Hold Points</li> <li>(3) No Railway System equipment It is expected that three (3) Employer's Personnel and two (2) or (1) Engineer's Personnel shall attend t each inspection of the railway systems (8 <u>9</u> systems) at three (3) times with five seven (7) days including travel time for each inspection</li> </ul>			
3.	Table 10.1: Inspections	Revise row "Remarks: Railway Systems" with the following:         Table 10.1: Inspection         No.       User       Quantity       Remarks: Railway Systems			

Annex "B"	Metro Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works					
			1	Employer	24 roundtrips * 7 days * 3	
					persons	Signaling System,
						Telecommunications System,
						Power Supply System,
						Overhead Contact System,
						Automatic Fare Collection System,
						Platform Screen Door System,
						Maintenance Vehicle and Depot Equipment,
						Maintenance Management System (MMS),
						Each system includes PRI & TC equipment.
4.	APPENDIX 12,	Added new section 7 in ERG Appendix 12 with the following requirements;				
	TEMPORARY SERVICES SEC 7 TEMPRORAY	<u>SE</u>	C 7 T	EMPRORAY A	ACCESS SHAFT	
	ACCESS SHAFT	Cu	rrontl	v a tomnorary	accoss shaft 26mtrs x 3	5mtrs for transferring rail and other equipment from the
	ACCEDS SHAFT					e made available by the Civil contractor at Tandang Sora
						ial Operability (PO) Section. The shaft at Tandang Sora
						e (3) months from the hand over date and North Avenue
					from the hand over date.	
		<u>Sta</u> <u>Re</u> No	n <u>tion,</u> maini te. As	Bonifacio Glo ng Operability s per ERG App	bal City (BGC) Station : (RO) Section. pendix 6 section 3.2 the o	le for six (6) months at Katipunan Station, Ortigas South and Lawton Station from the hand over date/s for the Contractor shall also propose their own requirement for ing construction, as part of the interface requirement.

	Metro Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works					
	Volume II, Part 2 – Volume II, Part 2 – Employer's Requirements (ER)					
			c) Technical Requirem	ents (ERT)		
5.	ERT, 1) TRACK WORKS,	Revise	item (3) c) with the following	additional item:		
	Section 1.21.5	(3) c) Ve	ehicle Dimensions and Featu	res:		
	Rail Profile Grinding Car					
			<u>x1)</u> <u>A vacuum system shal</u>	be supplied with the rail profile grinding car to fully collect rail		
			grinding debris and dep	osit them in an on-board container. The container shall be removable		
			from vehicle by fork-lift	truck for discharging debris.		
6.	ERT, 2) SIG,	Revise	first bullet with the following	¢		
	Section 2.5.2 Speed	There		n in train operation according to operation mode.		
	Regulation	There s	shall be train speed regulatio.	in in train operation according to operation mode.		
		• ATO/ATP mode; Max. 120 km/h (Underground section: Max. <del>80</del> <u>85</u> km/h);				
7.	ERT, 2) SIG,	Revise	item 2 with the following:			
		TICATOC	TIOTH & WITH THE TOTIO WILLS.			
	Table 2.5.3-Details of					
	Signaling System	No.	Item	Content		
		2	Maximum operation speed	80 85 km/h (underground area), 120 km/h (elevated area)		

	Metro Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works				
8.	ERT, 2) SIG, Appendix A.13 - Point machines within Depot and mainline	Item 2 of Interface Detail description to be deleted.         Interface Detail       1)       The track work team shall convey the point machine type to be installed on the mainline and Depot area depending on the switch type used.         2)       For the turnout of train speed 160km/h.         3)       Point machine shall be installed on long sleepers by the Track team.         4)       Signaling contractor shall provide an installation drawing with dimensions to the track team.			
9.	ERT, 8) MVDE, Section 8.6.2 Service Life of Major Equipment	Revise item (1) with the following new item:         > 26.08 Automatic Pantograph Inspection System			
10.	ERT, 8) MVDE, Section 8.9.1 Depot Layout	Revise item (5) with the following new item:         >       The design shall include flood prevention measures at the train inspection area from train wash plant.			
11.	ERT, 8) MVDE, Section 8.9.2 Workshop Layout	<ul> <li>Revise this section with the following new items:</li> <li>A canopy for weather protection shall be provided immediately outside the workshop entrance/exit to protect loading and unloading of equipment from rain.</li> <li>Truck access inside the workshop shall be required for pickup and delivery of goods within the crane coverage area for loading/unloading of major components i.e. trains, air conditioners, bogies etc.</li> </ul>			

	Metro Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works				
12.	ERT, 8) MVDE,	Add new section with the following requirement:			
	Section 8.9.3				
	(New Section)	8.9.3 Infrastructure Maintenance Depot			
		a) <u>Trackwork and OCS Facilities</u> The Infrastructure Maintenance buildings for trackwork and OCS maintenance shall be combined			
		within one complex for efficiency while minimizing M&E requirements. The technical			
		requirements related to workshops are included in sections 24.03, 24.04, 24.05, and 24.06 and in			
		addition the following are to be included.			
		Combined Workshop building with facilities including			
		- <u>Workshop with 2 tracks and maintenance pits.</u>			
		- <u>Storage space for maintenance tools.</u>			
		- Office space, personnel facilities, one or two levels.			
		- <u>Secure storage for high-value materials (e.g. contact wire, turnout machines, etc.).</u>			
		- <u>5 tones Overhead cranes.</u>			
		- <u>Storage space for train rescue equipment.</u>			
		Storage tracks (4) embedded, adjacent to workshop for trackwork and OCS vehicles.			
		- <u>Roof for weather protection</u>			
		- <u>Solid surface for forklifts between tracks</u>			

Metro Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works				
<sup>13.</sup> ERT, 8) MVDE, APPENDIX 1.1, 1.05 (NOT USED)	<ul> <li><u>- AFC, 150 m<sup>2</sup></u>.</li> <li><u>- Depot E&amp;M services, 300 m<sup>2</sup></u>.</li> <li><u>All the above room sizes are to be confirmed during detail design</u>.</li> <li><b>Change "(NOT USED)" to "HIGH PRESSURE WASHER" and include with the following requirement:</b></li> <li>1.05 (NOT USED) <u>HIGH PRESSURE WASHER</u></li> </ul>			
	<ol> <li>Quantity: Six (6) sets</li> <li><u>Two (2) units shall be assigned to Light Repair Shop (LRS), two (2) units to Workshop (WKS),</u> and two (2) units to Track Maintenance Car Shop.</li> </ol>			

Annex "B"	Metro Manila Subway Project Phase 1 kage CP106: E&M Systems and Track Works
	<ul> <li><u>Functional Requirements</u></li> <li><u>High pressure hot water/steam cleaner for washing railway components and machines</u></li> <li><u>operating in tunnels, including removal of residues, grease, wheel-rail lubricants and other</u></li> <li><u>deposits from trains and maintenance vehicles and equipment.</u></li> </ul>
	<ul> <li>be positive from trains and maintenance ventices and equipment.</li> <li>b) Design</li> <li>b) Deperation with cold and completely equipped with following items but not limited to: <ul> <li>a) Electrical power - 3 Ph, 400 V, 60 Hz.</li> <li>b) Operation with cold and hot water, steam, as well as detergent</li> <li>c) Integrated detergent tank and detergent injector</li></ul></li></ul>
	• <u>LED nozzles shall be mounted with trigger guns/spray lances</u>

14.       ERT, 8) MVDE, APPENDIX 1.1, 02.01 CLEANING SET       Revise items 2 a) and new items in 2 b) with the following: a) in the Washing shop at the LRS building.         14.       ERT, 8) MVDE, APPENDIX 1.1, 02.01 CLEANING SET       Revise items 2 a) and new items in 2 b) with the following: a) in the Washing shop at the LRS building.         14.       Description of the cleaning set shall have the following shot not limited to: > Two (2) sets – Airconditioner heat exchanger cleaning equipment to completely clear surfaces without abrasion. > Operation modes with high flow-rate compressed air nozzle, and alternatively with compressed air and water.		Metro Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works					
14.       ERT, 8) MVDE, APPENDIX 1.1, 02.01 CLEANING SET       Revise items 2 a) and new items in 2 b) with the following: a) in the Washing shop at the LRS building.         14.       ERT, 8) MVDE, 			<u>High-pressure long-life hoses approximately 10 m long</u>				
<ul> <li><sup>14.</sup> ERT, 8) MYDE, APPENDIX 1.1, 02.01 CLEANING SET</li> <li><sup>14.</sup> Functional Requirements a) in the Washing shop <u>at the LRS building</u>.</li> <li><sup>14.</sup> Functional Requirements b) The cleaning set shall have the followings, but not limited to: &gt; Two (2) sets – Air-conditioner heat exchanger cleaning equipment to completely clear surfaces without abrasion</li> <li><sup>14.</sup> Operation modes with high flow-rate compressed air nozzle, and alternatively with compressed air and water.</li> </ul>							
14.       ERT, 8) MVDE,         APPENDIX 1.1,       2. Functional Requirements         02.01 CLEANING SET       2. Functional Requirements         a)			<u>k)</u> The high-pressure water cleaner shall be suitable for lifting with fork lift.				
14.       ERT, 8) MVDE, APPENDIX 1.1, 02.01 CLEANING SET       Revise items 2 a) and new items in 2 b) with the following: 			1) Two (2) sets safety gear shall be provided with each unit.				
14.       ERT, 8) MVDE, APPENDIX 1.1, 02.01 CLEANING SET       Revise items 2 a) and new items in 2 b) with the following:         14.       ERT, 8) MVDE, APPENDIX 1.1, 02.01 CLEANING SET       Revise items 2 a) and new items in 2 b) with the following:         14.       ERT, 8) MVDE, APPENDIX 1.1, 02.01 CLEANING SET       Revise items 2 a) and new items in 2 b) with the following:         14.       ERT, 8) MVDE, APPENDIX 1.1, 02.01 CLEANING SET       Revise items 2 a) and new items in 2 b) with the following:         14.       Distance       Error of the second se			m) Storage compartment for tools, gloves and safety gear.				
14.       ERT, 8) MVDE,       Revise items 2 a) and new items in 2 b) with the following:         14.       APPENDIX 1.1,       2.         02.01 CLEANING SET       2.         14.       b) The cleaning set shall have the following:         14.       b) The cleaning set shall have the following:         14.       Two (2) sets – Air conditioner heat exchanger cleaning equipment to completely clear surfaces without abrasion.         14.       Operation modes with high flow-rate compressed air nozzle, and alternatively with compressed air and water.			<u>n)</u> Lances and hoses shall be provided with quick connect/disconnect fittings.				
14.       ERT, 8) MVDE,         APPENDIX 1.1,       02.01 CLEANING SET         2.       Functional Requirements         a)       in the Washing shop at the LRS building.         b)       The cleaning set shall have the followings, but not limited to:         >       Two (2) sets – Airconditioner heat exchanger cleaning equipment to completely clear surfaces without abrasion.         >       Operation modes with high flow-rate compressed air nozzle, and alternatively with compressed air and water.							
APPENDIX 1.1,       2. Functional Requirements         a)			vale, etc.				
02.01 CLEANING SET       2. Functional Requirements         a)      in the Washing shop <u>at the LRS building</u> .         b)       The cleaning set shall have the followings, but not limited to:         > <u>Two (2) sets - Air-conditioner heat exchanger cleaning equipment to completely clear surfaces without abrasion.</u> > <u>Operation modes with high flow-rate compressed air nozzle, and alternatively with compressed air and water.</u>	14.	ERT, 8) MVDE,	Revise items 2 a) and new items in 2 b) with the following:				
<ul> <li>a) in the Washing shop <u>at the LRS building</u>.</li> <li>b) The cleaning set shall have the followings, but not limited to:</li> <li>&gt; <u>Two (2) sets - Air-conditioner heat exchanger cleaning equipment to completely clear surfaces without abrasion.</u></li> <li>&gt; <u>Operation modes with high flow-rate compressed air nozzle, and alternatively with compressed air and water.</u></li> </ul>		APPENDIX 1.1,					
<ul> <li>b) The cleaning set shall have the followings, but not limited to:</li> <li><u>Two (2) sets - Air-conditioner heat exchanger cleaning equipment to completely clear surfaces without abrasion.</u></li> <li><u>Operation modes with high flow-rate compressed air nozzle, and alternatively with compressed air and water.</u></li> </ul>		02.01 CLEANING SET	2. Functional Requirements				
<ul> <li><u>Two (2) sets – Air-conditioner heat exchanger cleaning equipment to completely clear surfaces without abrasion.</u></li> <li><u>Operation modes with high flow-rate compressed air nozzle, and alternatively with compressed air and water.</u></li> </ul>			a) in the Washing shop <u>at the LRS building</u> .				
<ul> <li>surfaces without abrasion.</li> <li>➢ Operation modes with high flow-rate compressed air nozzle, and alternatively with compressed air and water.</li> </ul>			b) The cleaning set shall have the followings, but not limited to:				
Operation modes with high flow-rate compressed air nozzle, and alternatively with compressed air and water.			> Two (2) sets – Air-conditioner heat exchanger cleaning equipment to completely clean				
compressed air and water.			surfaces without abrasion.				
			> Operation modes with high flow-rate compressed air nozzle, and alternatively with				
			compressed air and water.				
15. ERT, 8) MVDE, Revised item 2 i) and added new item 2 n) with the following:	15.	ERT, 8) MVDE,	Revised item 2 i) and added new item 2 n) with the following:				
APPENDIX 1.1,		APPENDIX 1.1,					
04.01 UNDERFLOOR		04.01 UNDERFLOOR					

Annex "B"		Metro Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works
	WHEEL RE-PROFILING LATHE	<ul> <li>2. Functional Requirements <ol> <li>Wheelset data of EMU is described below;</li> <li> — Tread profile: EN tread(planning), </li> <li> . </li> <li> n) <u>An air compressor to provide the necessary air supply for brake release of trains shall be supplied with air hose sufficient length (min. 25 m) and secured quick-connect fittings. </u></li> </ol></li></ul>
16.	ERT, 8) MVDE, APPENDIX 1.1, 05.04 UNDERFLOOR EQUIPMENT LIFTER 2-T	<ul> <li>Revised item 3 c) with the following:</li> <li>3. Design</li> <li>c) Battery charger installed on the lifter shall be provided, if possible.</li> </ul>
17.	ERT, 8) MVDE, APPENDIX 1.1, 06.01 UNDERFLOOR AIR BLOW MACHINE WITH DUST COLLECTOR	Revised item 2 to include the following new item f):         2. Functional Requirements         f) Supply of compressed air shall be provided from LRS building.
18.	ERT, 8) MVDE, APPENDIX 1.1, 07.04 TEMPORARY BOGIE	Revise item 1 with the following; 1. Quantity: Ten (10) sets (2 trailer bogies <u>per set</u> )
19.	ERT, 8) MVDE, APPENDIX 1.1,	Revise items 2 i), add new items 2 l) and 3 g) with the following:

	мето Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works				
	10.06 BOGIE WASHING	2. Functional Requirements			
	MACHINE	i) The chemical fluid and washing water shall be separately stored in different tanks and <del>reused</del>			
		<u>reconditioned</u> to reduce consumption.			
		1) <u>A boiler shall be supplied to provide steam for washing of bogies.</u>			
		3. Design			
		g) The bogie washer shall satisfactorily operate with wash solutions readily available in the			
		<u>Philippines.</u>			
20.	ERT, 8) MVDE,	Add new section with the following requirements:			
	APPENDIX 1.1,	10.12 BOGIE TEST STAND			
	10.12 BOGIE TEST STAND	10.12 DOGIE TEST STAND			
	(New Section)	1. <u>Quantity: One (1) Unit</u>			
		2. <u>Functional Requirement</u>			
		Contractor shall supply a bogie test (pre-load) stand for testing of bogies after overhaul with			
		the following:			
		a) <u>PLC controlled machine with industrial PC</u>			
		b) <u>Simulation of car body load</u> ,			
		c) <u>Measurement of individual wheel loads and distribution</u> ,			
		d) <u>Calculation of shim plates for primary and secondary suspension</u> ,			
		e) <u>Air suspension leakage test,</u>			
		f) Two (2) Hydraulic units to simulate maximum car body load. Hydraulic load shall be			
		adjustable according to bogie tested, and			
		g) <u>Display of test process and data on computer, and recording of test results for</u> <u>downloading to maintenance management system on-line or via USB device.</u>			

Annex "B"	Metro Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works				
21.	ERT, 8) MVDE, APPENDIX 1.1, 15.06 WHEEL LATHE	<ul> <li>Revise item 2 f) with the following:</li> <li>2. Functional Requirements <ul> <li>f) <u>Chip crushing facility, with chip collection and transfer by conveyor(s) to container on workshop</u></li> <li><u>floor (next to machine) for removal by forklift.</u> The chip conveyor shall be integrated. Two (2) chip</li> </ul> </li> </ul>			
22.	ERT 8) Appendix 1.1 18.04 AIR BRAKE SYSTEM TEST STAND	<ul> <li>bins shall be provided with the lathe.</li> <li>Revise item 3 with the following:</li> <li>3. Design Maintenance equipment, tools, and test equipment shall be provided for servicing, preventive maintenance, trouble-shooting, repairs and overhauls of brake systems, including brake test stand, and portable 33 brake test and diagnostic equipment for passenger rolling stock and infrastructure maintenance vehicles.</li></ul>			
23.	ERT, 8) MVDE, APPENDIX 1.1, 24.07 CATENARY MAINTENANCE VEHICLE	<ul> <li>Revise last bullet of item 3 with the following;</li> <li>3. Design and Performance <ul> <li>→ Testing of Overhead Catenary System (OCS), Signalling and Communication systems with integrated test modules supplied separately.</li> <li>&gt; Testing of Overhead Catenary System (OCS), Signalling and Communication system with integrated test modules with special tools shall be supplied separately.</li> </ul> </li> </ul>			
24.	ERT, 8) MVDE, APPENDIX 1.1, 24.10 EMERGENCY TRUCK (New Section)	Add new section with the following requirements;         24.10       EMERGENCY TRUCK         Emergency truck to attend train derailment site (both Rail and Road drive Type)			

nnex "B" Matra Marila Subway Project Phase 1				
Metro Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works				
	<u>1.</u> <u>Quantity: Two (2) sets</u>			
	2. <u>Functional Requirements</u>			
	a) The truck shall be able to be carry tools and standard accessories for re-railment.			
	b) The truck shall be able to run city road, highway and rail track.			
	<u>c)</u> <u>The performance of the truck shall have the following but not limited to:</u>			
	Size: within Rolling Stock gauge,			
	<u>Type: diesel engine truck, both rail and road drive,</u>			
	$\succeq$ <u>Track gage: 1,435 mm</u> ,			
	$\geq$ Coupler: coupler is not required,			
	Driver cab: single cab, with air conditioner,			
	<u>Diesel Driven Traction force: Approx. 200PS</u> ,			
	Speed: max speed more than 80km/h in road.			
	<u>3.</u> <u>Design</u>			
	a) The truck shall be able to operate by single driver both on rail at 3.5% gradient over 5km/h and			
	road.			
	b) The truck shall be equipped with the following features, but not limited to:			
	> <u>All equipment in the Truck which need to be used on railway shall be able to run on road</u>			
	accordance with laws,			
	➢ The crane for load and unload items			
	Open wagon type structure			
	> The truck length shall be considered to go inside track from railroad crossing.			
	Parking brake.			
	Short-circuit wheel and axle			
	> The siren with beacon light which comply with laws,			
25. ERT, 8) MVDE,	Add new section with the following requirements;			

Annex "B" Metro Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works				
APPENDIX 1.1,	24.11 MAINTENANCE LOCOMOTIVE FOR TRACTION			
24.11 MAINTENANCE LOCOMOTIVE TRACTION	<u>Quantity: Two (2) sets</u>			
(new item)	Functional Requirements			
	The locomotive shall be provided for general maintenance work.			
	➤ The locomotive shall be able to pull wagons or a train.			
	➤ The locomotive shall be able to run on rail track.			
	➤ The locomotive shall be able to connect to all locomotives and wagon.			
	One (1) locomotive is for back up, and it will be used by PRI (Philippine Railway Institute) fo			
	teachings.			
	Major performance of the locomotive shall be as follows:			
	Size: within Rolling Stock gauge,			
	Yype: diesel engine locomotive,			
	➢ Track gage: 1,435 mm,			
	≥ Coupler: the coupler for MMSP trains and the coupler coordinated with other locomotives and			
	wagons of MMSP (refer to sections 24).			
	Driver cab to permit bi directional operation, with cab light and air conditioner.			
	➢ Traction force: For 350 tons load at 3.5% gradient over 5km/h			
	≥ Speed: max speed more than 20km/h with no load. (25 km/h speed limiter is required)			
	➢ Design			
	The locomotive shall be able to operate by single driver			
	➤ The locomotive shall be equipped with the following features, but not limited to:			
	Wide windows for wide and clear view from the cab for safe operation.			
	Decks, hand rails and ladders for staffs,			
	> Spring powered failsafe parking brake. Air brake system for wagons and train with leakage			
	detection. Electric co-working braking system between other locomotives which can connectable			

Annex "B"					
	Metro Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works				
		Sanding device for wheel slip.			
		<u>1 Horn, 4 or more flashing head lights for front and rear.</u>			
		Emergency stop buttons on the vehicle cabs.			
		Torque converter and engine cut-off system, to be able to run by other locomotive power.			
		➤ The following accessories shall be included, but not limited to:			
		<u>Standard accessories</u> ,			
		<u>Maintenance tool kit.</u>			
		<u>Interface Requirement</u>			
		Interface shall be taken with Rolling Stock Contractor at the appropriate timing.			
26.	ERT, 8) MVDE,	Revise item 3 e) with the following;			
	APPENDIX 1.1,	3. Design			
	26.05 RESCUE DEVICE	e) Temporary rescue <del>truck</del> <u>bogie</u>			
		This truck bogie shall be used for carrying heavy damaged wheel-set after being restored			
		from the derailment. It shall consist of several components which can be lifted and			
		handled by no more than two persons per item, and assembled into truck bogie on site.			
27.	ERT, 8) MVDE,	Add new section with the following requirements;			
	APPENDIX 1.1,				
	26.08 AUTOMATIC	26.08 AUTOMATIC PANTOGRAPH INSPECTION SYSTEM			
	PANTOGRAPH	<u>1.</u> <u>Quantity: 1 (One) Set</u>			
	INSPECTION SYSTEM	2. <u>Functional requirements</u>			
	(New Section)	A pantograph inspection system shall be supplied and installed on a common structure across			
		two depot tracks with trains operating at 5-25 km/h. The pantograph inspection equipment			
		shall measure the condition of pantograph sliding plates of trains operating on each track.			
		The measurement process shall use ultrasonic sensor technology and establish the thickness			
		of sliding plates and unusual wear of each pantograph contact surface on a train, show the			

Annex "B"				
Metro Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works				
	condition of wear and project the remaining service life of sliding plates. Measurements shall			
	be displayed real-time on computer screens and stored on the server of the Maintenance			
	<u>Management System (MMS).</u>			
	The pantograph inspection system shall automatically identify and record train, car and			
	pantograph identification related to measurements. Trains will permanently operate in same			
	orientation. Out-of-tolerance conditions due to wear, penetration, damage, etc.; shall be			
	displayed, recorded and graphically high-lighted with warning messages.			
	a) <u>Measurement conditions:</u>			
	Pantographs:			
	i. <u>Initial fleet, 30 trains – 4 Pantographs per 8-car train;</u>			
	<u>ii.</u> <u>Ultimate fleet 58 trains – 5 Pantographs per 10-car train (after 20 years)</u>			
	<u>iii.</u> Shoes (85 mm width) x 2 rows (250 mm pitch) per pantograph			
	Train operation			
	<u>i.</u> <u>Running speed 5 – 25 km/h</u>			
	ii. Measurement in north-to-south direction			
	<u>iii.</u> <u>Traction voltage DC 1500 V</u>			
	3. Design and performance			
	<u>a)</u> The pantograph inspection system shall provide:			
	i. <u>Sense direction of train movements</u>			
	ii. <u>Sliding plate base level distance measurement and thickness calculation</u>			
	<u>iii.</u> <u>Sliding plate conditions shall be displayed three-dimensionally.</u>			
	iv. <u>Projection of sliding plates service life</u>			
	v. Store measurement data of 58 trains operating daily for period of 30 days.			

	Metro Manila Subway Project Phase 1 Package CP106: E&M Systems and Track Works				
		b) Equipment composition i. 2 Sets – Air ultrasonic wave sensor ii. 2 Sets – Ultrasonic sensor maintenance mechanism (sensor head, sensor cable) iii. 1 Set – Measurement data-processing system iv. 1 Set – Computer for sliding plate measurement v. 1 Set – Optical-communications unit vi. 2 Sets – Warning display unit
